TITLE: Axial Compressor producing powerful air flow necessary for tests in the modern aerodynamic laboratory, where models of aircraft reaching a speed greater than that of sound are tested. It is shown not working and part of the tunnel near it is open. When working, it is powered by two motors in tandem, each of 25,000 HP, and can rotate with the speed of 475 to 500 turns a minute, creating air flow speed of 1,350 to 2,400 kilometers per hour.
